Re: Chapter 65 Permits In Connection With
Soil and Erosion Control Measures at the Dover Knolls

Dear Ms. Fusco:

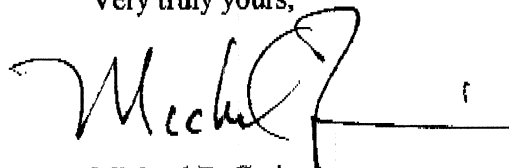

This is in furtherance of our letter, dated March 12, 2007, which was sent to you by facsimile this morning.

Beth Evans, the Applicant's wetlands consultant, has advised us that she is ready, willing, and able to commence the remedial work to safeguard the identified critical habitats tomorrow, March 13, 2007, pursuant to the Planning Board's December 20, 2006 Resolution. Evans is concerned that inclement weather may prevent her from accomplishing this work later this week.

Accordingly, unless we hear from you otherwise by the end of business today, we will assume that it is now understood and agreed that the Applicant can immediately commence the work contemplated by the Remedial Permit.

Please do not hesitate to contact us should you have any questions or comments.

Very truly yours,

Michael D. Zarin
